Guest Speaker

Dr. James Estes, Professor Ecology & Evolutionary Biology, UCSC

Topic: Sea Otters

Dr. James Estes is Distinguished Professor in the Department of Ecology and Evolutionary Biology at University of California at Santa Cruz. Estes is a wildlife ecologist, recognized for his work on the ecosystem-level influences of large predators. He is known especially for studies of sea otters and kelp forest ecosystems, from which he demonstrated the enhancing influence of predators on the distribution and abundance of plants through what has since come to be widely known as a “trophic cascade”. Estes was born in Sacramento,

California, in 1945. He graduated from the University of Minnesota with a degree in zoology in 1967, subsequently obtaining a Masters in Biology from Washington State University in 1969 and a PhD in biology and statistics from the University of Arizona in 1974. He was employed as a research scientist by the U.S. Fish and Wildlife Service and the U.S. Geological Survey from 1974 to 2007, after which he joined the

faculty at the University of California at Santa Cruz. In recognition of his work’s scientific and societal impacts, Estes received the U.S. Geological Survey’s Schumaker Award for excellence in science communication, the Western Society of Naturalists’ Lifetime Achievement Award, and the American Society of Mammalogists’ C. Hart Merriam Award.

The President's Article

Welcome to Fall

The word **fall** comes from the Old English word feallan that means “to **fall** or to die.” Over time, the phrase was shortened to **fall**. ... The use of the word fall fell out of favor in England. Today, American English uses the word **fall**, while British English uses **autumn** almost exclusively.

September 23, 2019 was the day of the **Autumnal Equinox**, the start of the fall season. At the autumnal equinox both the Northern and Southern hemispheres experience an equal amount of daylight. It's also the beginning of astronomical fall, with daylight hours continuing to shorten until the winter solstice in December.

I like fall. It has always meant a new beginning to me... probably because it was always the time to start a new school year. Other reasons folks say they like fall include: Halloween, Thanksgiving, pumpkin-flavored everything, gaining back the hour we lost in Daylight Savings time, football, sweaters, hoodies, colorful red, yellow, and orange vegetation, earlier sunrises, etc. What do you like about fall?

I hope you will take advantage of all the wonderful activities at OLLI this fall: wonderful courses, new and familiar Interest Groups, and the start of our General Meetings with incredible speakers. I look forward to seeing you at many of the events.

Happy fall to all!

Courses

Gulliver's Travels

Mondays, September 9, 16, 23, 30. 10 AM - 12
 Location: Museum of Art and History, 705 Front St.
 Instructor: Bill Park

You are cordially invited to attend four classes on Jonathan Swift's *Gulliver's Travels* (1727), recognized as a classic the day it was published and never since out of print. How did Swift do it? On the one hand the book is a humorous easy-to-read account of four imaginary voyages, somewhat akin to science fiction. But on the other hand it is a satire on eighteenth-century England, a savage indictment of human nature, an uncanny and prophetic prophecy of our own modernity. It is at the same time enjoyable and thought-provoking. Welcome to the discussion.

[Recommended text: *Gulliver's Travels* (Penguin Classics)]

Bill Park is an Emeritus Professor of Literature at Sarah Lawrence College, where he taught for many years. He received his PhD in Eighteenth Century English Literature from Columbia University. He has written extensively about literature and film. We are fortunate that he has moved to Santa Cruz and is eager to share his knowledge with us. Our members who have attended his classes were impressed by his encyclopedic knowledge of film and literature.

International Affairs: Fall 2019

Tuesdays September 10, October 8, November 12.
 10AM - 12
 Location: Fellowship Hall, Peace United Church of Christ
 900 High Street
 Instructor: Ronnie Gruhn

Session 1: Updating US Foreign Policy; Europe, Middle East, China, Environment, Migration etc.

Session 2: Why Africa matters for the many crises afoot today

Session 3: New trends and new actors in world affairs. Non state actors, changing role of state actors, decline of the US, rise of China, a messy Europe, populism, challenges to democracy

We are again fortunate to have Ronnie Gruhn, Professor Emerita of Politics at UCSC, as one of our teachers. She has a passionate and undiminished interest in reading, writing, and talking about world affairs. Her courses offer powerful insights into what is happening today.

Ronnie has been very generous in sharing her knowledge with OLLI members, and her courses have been exceedingly well attended.

The Birth of Contemporary Chinese Fiction in the 1920s

Thursdays, October 17, 24, 31, November 7, 14, 21
10AM - 12

Location: Museum of Art and History
705 Front St.

Instructor: Dale Johnson

After the fall of the Ching Dynasty in 1908, Chinese intellectuals experienced tremendous changes that included going abroad to Japan and Europe, and a new idea of literature, which included writing fiction in the contemporary language.

Among the first and most successful writers was Lu Xun 1881-1936. He was among the first to write fiction in a western style. His reasons for writing fiction in his own words were:

"I feel today, as I did ten years ago, that I should write in the hope of enlightening my people, write about human life and the need to better it...I drew most of my characters from the unfortunates in our abnormal society, because I wanted to expose certain evils, arouse attention to them, and help them to cure them."

Dale Johnson was Professor of Chinese at both Oberlin College and UCSC. He has engagingly shared his love for and knowledge of Chinese literature in OLLI courses for the past six years.

Women in Western Civilization from Ancient Near East through the 18th Century

Tuesdays, October 15, 22, 29, November 5, 19
10 AM - 12

Location: Museum of Art and History 705 Front St.
Instructor: Gail Greenwood

This class will review women's history taught in 2013-16 from Ancient Civilizations through the Renaissance, for the first two classes in order to establish the important concepts of women's history as differentiated from men's. Then we will examine 16th-18th Century Europe and the development of the national states, Christianity, humanism, and colonialism as they applied to women. The romp will be fast and obviously broad stroke--a survey. Both men and women are welcome.

Now that Gail has completed two outstanding years as President of OLLI, she will again be sharing her teaching skills with us.

Gail Greenwood is a retired community college history teacher. For thirty-four years, she taught survey courses in American History, Western Civilization, and Women in both American and Western Civilization. In the 1970s she created the first Women in American History courses at American River College. Her students kept asking her to explain all the odd assumptions of the founding parents and wouldn't accept her answer that "They brought the beliefs with them along with their Bibles, pots, and pillows." She had to return to reading and studying and then she created a course about Women in Western Civilization. Her first startling discovery for one trained in modern Western Civilization with a focus on the Third Reich was that she ended up clear back in archaeology. Fortunately this multidisciplinary approach didn't bother folks at the community college and she hopes it will also be accepted by lifelong learners willing to gallop through history.

The Search For Life in the

Universe

Wednesdays, October 23, 30, November 6, 13, 20,
27, 10 AM -12

Location: Museum of Art and History
705 Front St.

Instructor: Roger Knacke

We will discuss highlights of the search for extraterrestrial life in the universe, a very hot topic in astronomy. Background in science is not necessary.

Meetings:

1. The Cosmic Context for Life
2. Life on Earth
3. Search for Life on Mars
4. Search for Life in the Outer Solar System
5. Exoplanets
6. SETI Searches for Extraterrestrial Intelligence and Future Directions in the Search for Life

Dr. Roger Knacke is Emeritus Professor of Physics and Astronomy, Penn State Erie. He retired as Director of the School of Science in 2010. His research focussed on interstellar matter and planetary atmosphere.

Film Comedy

Mondays, November 25, December 2, 9, 16 9:30 -
AM 12:30

Location: Museum of Art and History 705 Front St.

Instructor: Bill Park

In this course we will enjoy and examine four Hollywood comedies: *City Lights* (1931); *It Happened One Night* (1934); *The Apartment* (1960); and *Groundhog Day* (1993). Each of these films represents a different era, and each involves different social issues. Yet all four will contribute to our developing a theory of the very nature of comedy.

Bill Park is an Emeritus Professor of Literature at Sarah Lawrence College, where he taught for many years. He received his PhD in Eighteenth Century English Literature from Columbia University. He has written extensively about literature and film. We are fortunate that he has moved to Santa Cruz and is eager to share his knowledge with us. Our members who have attended his classes were impressed by his encyclopedic knowledge of film and literature.

Modern Molecular Biology Year 10

Saturdays, October 19, 26, November 2, 9, 16
10:30 AM - 12

Location: Physical Science Building, Room 240
UCSC

Instructors: Barry Bowman and other UCSC
faculty

A typical animal cell contains more than 40,000 different kinds of molecules. In the past 20 years great progress has been made in understanding how these molecules combine and interact to form a living creature. In this course four UCSC Professors will talk about recent discoveries in molecular biology. Tentative topics for this year focus on new developments in the origin of life, understanding the genetic program that converts a fertilized egg into an adult animal, and the proteins that play a central role in the development of Alzheimer's disease.

These talks are intended for a general audience. A scientific background or knowledge of biology is not expected. Barry Bowman, the course coordinator, will begin with a basic review of genes, proteins and cells. This will be followed by talks that focus on specific topics in molecular biology.
